

ITEM: 80420, 80421, 80422

---

DESCRIPTION: **CUSHIONED BALL MOUNT**

---

**Ratings**

10,000 pounds GTVW (Gross Towed Vehicle Weight)

1,000 pound MTW (Maximum Tongue Weight)

V-5 and SAE J684 rated

**!!WARNING!!**

Never exceed the receiver hitch rating, Hitch ball rating, or the vehicle manufacturer's recommended towing limitation.

Never modify the hitch bar by drilling, cutting, welding or grinding.

**INSTALLING THE CUSHIONED BALL MOUNT**

Ball mounts are designed to fit all standard 2 inch by 2 inch ID hitch tube sockets. Some sockets (closed end style) may not be deep enough to allow for proper hitch bar travel.

The ball mount should slide in and out freely. If your hitch is a closed end socket, check to see if it is deep enough (3.125" from pin hole to back of tube) for the hitch bar.
