

TELLING THE DIFFERENCE BETWEEN 14.5° AND 20° RACKS

Line 1 Line 2

Line 1 Line 2

1. Start by measuring the distance between two individual, adjacent teeth.
2. Using calipers or a steel rule, start on one the inside edge of one tooth, Line 1, and then measure over to the inside edge of the next tooth, Line 2.
3. The 14.5° rack will measure approximately .170 in. The 20° rack will measure approximately .231 in.
