Front Spring loaded
Qwick-Load Turnbuckle
(FM-QLTBS)

Rear Stress-Guard
Qwick-Load Turnbuckle
(FM-QLTBR)

Qwick-Load upgrade
(FM-QL)

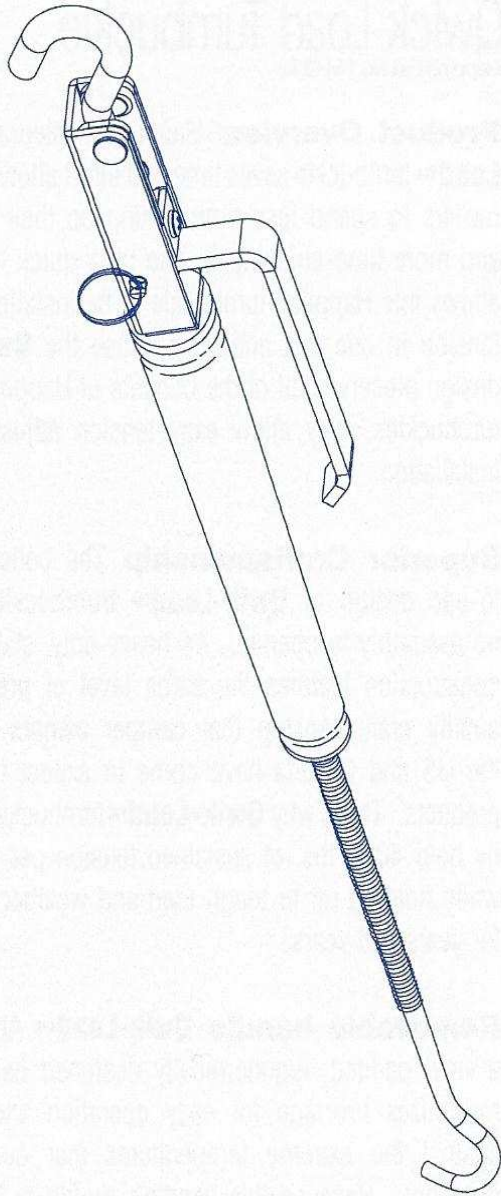

Product Overview Happijac's integrated **Qwick-Load™** turnbuckle saves time and effort allowing campe owners to spend less time setting up their equipmen and more time enjoying it. The ultra quick lever action allows this Happijac turnbuckle to be installed to prese tension in one fast action. Because the **Qwick-Load™** design preserves all of the benefits of Happijac's FM-TE turnbuckles, they allow easy tension adjustment afte installation.

Superior Craftsmanship The concise, ready to-use design of **Qwick-Load™** trunrbuckles require: no assembly to operate. It's heavy-duty, stainless stea construction features the same level of precision and quality craftsmanship that camper owners throughou the US and Canada have come to expect in Happijac products. That's why **Qwick-Load™** turnbuckles can eas ily hold 4000 lbs. of sustained tension per turnbuckle while holding up to tough road and weather condition: for years and years.

Removable handle **Qwick-Load™** Also feature: a vinyl padded, ergonomically designed handle which maximizes leverage for easy operation and insulate: against the extreme temperatures that occur in th outdoors. Because this handle's profile is higher thai competing products, operators not only enjoy greate leverage but never have to worry about smashing thei fingers when locking down under tension. The include: lock pin insures that **Qwick-Load™** remains securel in place and allows removal and storage of the handle to prevent theft or loss on the road.

Compatibility Happijac's **Qwick-Load™** is also avail able as an upgrade (part no. FM-QL) for any turnbuckl which is based on a 1/2" threaded rod, including al older versions of Happijac turnbuckles. Satisfied campe owners, including those who already trust the best engi neered turnbuckles in the world need not replace them in order to enjoy the benefits of **Qwick-Load™**.

Standard Features

Heavy-duty, quality construction

Features a stainless steel body and reinforced 1/2" solid steel round hook (as found in the standard Happijac turnbuckle, FM-TB) which can easily support 4000 lbs per turnbuckle.

Fast, Easy clamp-down Design

Simply attach the hooks to the camper and tiedowns as usual and clamp down into place in a single quick action.

Tension adjustment after installation

The Qwik-Load turnbuckle design allows traditional turning of the turnbuckle for tension adjustment after installation. There is no need to release Qwik-Load turnbuckle in order to achieved perfectly tuned tension. The standard tension nut can also be adjusted so you only have to fine tune once.

Soft, ergonomic removable handle

Features a rubber cushioned handle for comfort, insulation against extreme temperatures and increased operational leverage. Its' high profile handle insure that users never need worry about smashing their knuckles against the turnbuckle when locking down. Handle can be detached for storage and theft deterrence.

Locking pin

Locking pin keeps Qwik-Load securely in place while on the road and can quickly be pulled for fast removal and storage.

Product Specs

(FM-QLTB)

Construction

.125" round stainless steel tube
