

## **ON-OFF**

### **Battery Selector Disconnect Switch**

...for Dual Battery

- For applications up to 48 volts
- ISO #8846 marine approved
- Select either OFF – Battery1 – Batteries 1+2 or Battery 2
- Simple to install
- Can be recessed or surface mounted

#### **#20393 Installations:**

1. Read CAUTION! before installing switch.
2. Remove key from ignition and turn off all lights and accessories.
3. Keep Battery Switch knob in “OFF” position until all connections are complete.
4. Remove battery cables from the positive post. Clean battery terminal for a good electrical connection. Find a suitable location to install the Battery Switch.
5. Connect the positive cable from Battery 1 and connect to lug #1 inside switch.
6. Connect the positive cable from Battery 2 and connect to lug #2 inside switch.
7. Connect a new cable to the remaining lug inside switch from the starter motor and existing cable to heavy duty breaker or distribution block.
