NOTE: This is done from the interior of the coach.

1. Remove the motor screw.
2. Remove the bulb seal.
3. Locate the wiring harness and unplug from the motor.
4. Pull the flap seal down to access the motor notch (Fig. 1).

5. Push up on motor and tip the bottom out of the notch (Fig. 2).
6. Motor is removed.
7. Slide new motor in by pushing it up and tipping bottom into the notch.
8. Reconnect the wiring harness.
9. Push flap seal back into place.
10. Replace the bulb seal.
11. Replace the motor screw.
