

HYDRAULIC FULL WALL SLIDEOUT SYSTEM
POWER UNIT ADDENDUM - PAGE 6

POWER UNIT – 12V DC MOTOR W/PUMP & RESERVOIR

Send ports for the extension of the Full Wall Slideout System are positioned on the block with the Flow Divider. The return ports are positioned on the small square block on the retract side of the pump unit.

Page 6 of the “HYDRAULIC FULL WALL SLIDEOUT SYSTEM” represents the first version of the stand alone pump unit. This configuration showed the “Send” and “Return” ports in the opposite orientation of the pump unit shown above. The configuration above shows the current version of the “HYDRAULIC FULL WALL SLIDEOUT SYSTEM” pump unit.
