

### SUPPRESSION MODULE DIAGRAM

1. Right Rear Jack Valve (+)
2. Left Rear Jack Valve (+)
3. Front Jack Valve(s) (+)

**NOTE:** Front Jacks operate together. They will be linked together either through wiring or plumbing. If the valve manifold has 5 valves and only one slideout room, the front jacks are linked through wiring. If there are two slideout rooms, and the manifold has two hoses for front jack extend and two hoses for front jack retract, the front jacks are linked through the plumbing.

4. PSI Switch (Green Wire from PSI) (+)
5. Pump Retract (Green Wire to Solenoid) (+)
6. Pump Extend (Yellow Wire to Solenoid) (+)
7. Valve Ground (-)
8. PSI Switch (Black Wire from PSI) (-)
9. Valve Ground (-)
10. Valve Ground (-)
11. Valve Ground (-)
12. Valve Ground (-)
