

INSTALLATION & OPERATING INSTRUCTIONS

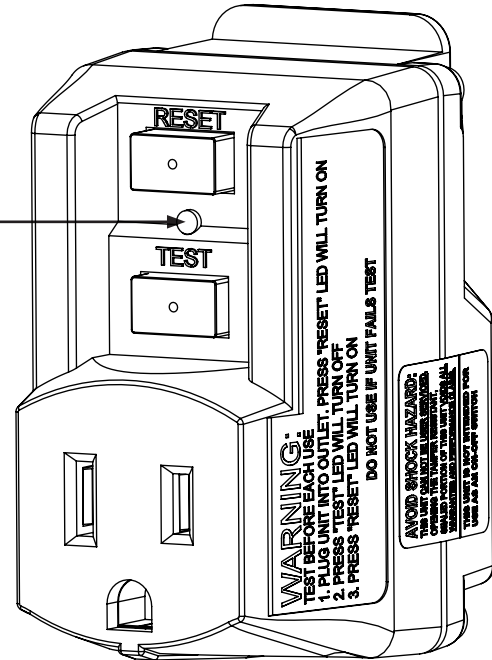

OVER-VOLTAGE AND SURGE PROTECTION FOR APPLIANCES

MODEL 44300
RV Over-voltage Adapter

This unit provides connected equipment with over-voltage and limited surge protection. It will turn off power to the connected equipment when a voltage above 138V is detected. Over-voltage conditions can occur from an open-neutral in outlet wiring or from switching heavy loads, such as an air-conditioner or washer and dryer, on and off.

The green LED indicates power to output when illuminated.

OPERATING INSTRUCTIONS

1. Plug the Surge Guard* over-voltage adapter 44300 into 120V outlet.
2. Press "RESET" Button. Green LED turns ON. Power is ON.
3. Press "TEST" button. Green LED turns OFF. Power is OFF.
4. Press "RESET" button. Green LED turns ON. Power is ON.
5. Plug in appliance.
6. **NOTE:** If unit does not pass the test above, do not use unit or outlet. Have a qualified electrician check outlet or call the Technical Support number below.
7. THIS UNIT IS NOT INTENDED FOR USE AS AN ON/OFF SWITCH.

TECHNICAL SPECIFICATIONS

FEATURES	MODEL 44300
Operating Current	15Amps
Operating Voltage	120 Volts
Maximum Watts	1800 Watts
Over/Under Voltage Protection	>138V
Trip Time	within 25mS
Warranty	Limited Lifetime
Easy Installation	Yes
