6105 16' TRAILER CHARGE LINE WITH 70061 BREAKER KIT INSTALLATION

TRAILER
GOOSE NECK OR FIFTH
WHEEL

Route the cables from the coupler up to the bottom of goose neck or fifth wheel floor across to the wall and down to the battery. Leave enough cable at trailer coupler to allow for hook up to tow vehicle and allow for turning. Be sure to keep cables clear of heat, moving parts, and sharp edges. Secure cables using clamps or wire ties.(not provided) If there is excess cable at the battery, they can be cut to the desired length. Crimp cable ends on the wires and add heat shrink. Connect the red cable to the breaker and then connect the short red cable between breaker and battery positive post. The last step is to connect the black cable to the negative post on the battery.

*Equalizer Systems Limited Warranty Policy

Only warranty claims with prior written or verbal authorization from Equalizer Systems will be recognized, all other claims will be denied. Equalizer Systems warrants Stay Charge system components for a period of **one year** from the date of original sale of the system. Labor and freight expenses due to warrantable parts defects or workmanship will be reimbursed for a period of **one year** from the date of original sale of the system. Freight expenses will be prepaid by Equalizer Systems for UPS Ground only.
