

Bicycle Transport

Using Bike Mount Hardware Kit(s)

GearSpace 34 transports up to two bicycles with front wheel removed. To transport in secured, upright position, Bike Mounting Hardware Kit(s) are an available option.

Fits two standard bicycles (mountain or road) with frames up to 60 centimeters (56" length frame & rear wheel), and handle bars up to 25" in width. Position bicycles in opposite direction as shown.

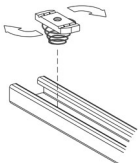

Each hardware kit per bike includes:

- **C Channel Track** (install in base using existing bolt holes and hardware)
- **Spring Nuts** (fits inside Track for 0.25 x 20" bolt hole fittings)
- **Mounting Brackets** (allows quick release to position at varying angles from the Track. This in turn allows the bicycle's fork and handle bars to angle for position fit as needed)
- **Quick Release Fork Mount** (secures front fork of bicycle to the carrier)
- **Length Adjustable Bungee Cord** (secures front wheel along side of bicycle frame inside carrier)

Installation

Bolt C Channel Track(s) inside base on opposite ends (farthest outward) as shown. To do so, unbolt existing hardware on carrier's floor. Line up holes with the track holes. Install using carrier's bolts and nuts; however, smaller washers are supplied to use in the track in place of the carrier's larger washers for proper fit.

Insert Spring Nut from kit assembly into track by pressing and twisting for fit. Apply remaining hardwares as shown in diagram. Final tightening after fit test of bikes inside carrier is recommended.

Mounting Bicycles Inside Carrier

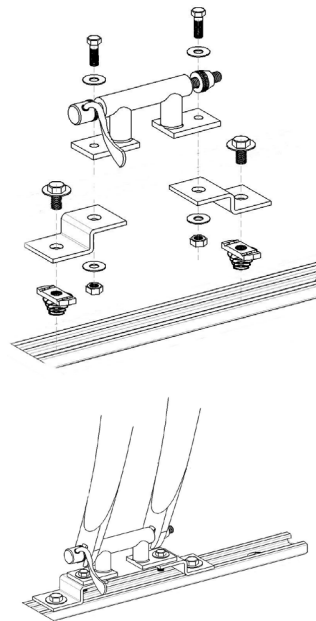

Position Quick Release along track at preferred location for best fit of bicycles and other cargo by loosening bolts to slide Quick Release along track. Loosen bolts to swivel Mounting Brackets to position Quick Release at varying angles that may be needed for fit of bicycle's handle bars. Secure free wheel to bike frame with length adjustable bungee cord.

One-Bike Mount Kit - HGK963 _____

Two-Bike Mount Kit - HGK970 _____

Parts List (per bike):

- 1 Bike Mount Skewer
- 2 Bike Mount Brackets
- 4 1/4" x 1" Bolts
- 4 1/4" x 1 Fender Washers
- 4 1/4" Standard Washers
- 2 1/4" Split Ring Washers
- 2 1/4" Nylock Nuts
- 2 1/4" Spring Nuts
- 1 18" C-Channel
- 1 Bungee Cord
