

Installation Instructions For Your  
MARSHALL EXCELSIOR  
ME65CL

**Be sure your Coleman Roadtrip Grill is NOT connected to a propane fuel source while installing the ME65CL.**

1. Remove the regulator assembly from the rear of the grill by unscrewing the brass connection.
2. Now separate the regulator assembly in to its two components by removing the regulator with metal tubing from the brass swivel connection component near the regulator tubing with vise-grip pliers or Channel-Lock pliers. Then unscrew the regulator/metal tubing by hand.
3. Apply Pipe Joint Compound (supplied in the kit) to the male threads of the ME65CL fitting. Install the ME65CL fitting into the brass swivel connection, tighten with a wrench. Turn until snug, plus 1/4 turn. **(assemble the brass fittings in order as you see them on the zip tie using the joint compound supplied in the kit)**
4. Install the brass swivel connection piece with ME65CL attachment to the rear of Coleman Roadtrip Grill as normal.
5. Attach the 3/8" Female Swivel Flare end of the 12' Hose provided in the ME65CL kit to the male 3/8" flare end ME65CL attachment to rear of grill. Tighten with wrench. **DO NOT USE PIPE JOINT COMPOUND ON THIS CONNECTION!!**
6. Be sure the gas control knob of your grill is in the off position.
7. If your RV has a shut-off valve as part of the quick-connect system, move it to the off position.
8. Insert the male end of the ME65CL hose assembly into female quick-connect fitting of the RV.
9. Now check all connections for leaks by thoroughly soaking each connection with leak detect solution (included in the kit). Be sure that the main propane supply on your RV is on at this time and if applicable, open valve at your RV's quick-connect port.
10. If the connection leaks, the leak detector will bubble within 5-20 seconds. **Turn off the propane supply immediately and tighten the leaking connections.**
11. Repeat the Safety Leak Check until you no longer see evidence of a gas leak.

**Always check your connections for leaks prior to using any propane products!!!**
