## Installation Guide

### Cargo Trays

1. Place the tray in the desired compartment and make sure the tray clears the lip of the door frame when extended. If it does not, you may have to use shims or may purchase and install MORryde Tray Extenders (CTG54-001) along the side rails to raise the tray.
2. Make sure the tray/shims are square with the compartment. If using shims, fasten\* them to the floor first.
3. Extend tray out slightly to expose the predrilled holes in the side rails. Begin to fasten the tray in first set of holes.
4. Continue to extend the tray outward while fastening\* the tray in each of the predrilled holes until it is fully extended.
5. If **NOT** using a 90” tray, once all visible predrilled holes have been secured, extend the tray until it hits the stops. Lift up on the front of the tray and it will slide over the stops. This will allow you to access the mounting holes in the frame underneath the tray.
6. If using a 90” tray, extend the tray in the opposite direction and repeat steps 3 & 4.

**\*Note:** Fasteners may differ depending on application. For this reason, hardware is not included. Be cautious of tanks/plumbing underneath.

# Other Essential MORryde Products

## Easy Reel Spooler

The Easy Reel™ Spooler is the latest innovative product from MORryde. The Easy Reel™ utilizes an ingenious design to allow for quick, simple and easy spooling of your 30 or 50 amp power cord. The patent pending design allows the power cord to be quickly and easily inserted to the spooler. It can be mounted for either left hand or right hand operation, and features rugged steel construction and high quality powder coat finish. The Easy Reel™ delivers the simplest, smoothest, and most convenient way to effectively store your power cord.

## TV Mounts

MORryde has designed a line of flat screen tv mounts that are designed specifically for RV's. MORryde knows about the challenges of designing products that can meet the challenges of today's rough roads and that extends to its' line of tv mounts. The product line includes base mounts, wall mounts, ceiling mounts, sliding mounts and motorized mounts. Many mounts have the ability to swivel, extend or tilt as well. For the complete listing of MORryde flat screen tv mounts, go to [www.morryde.com](http://www.morryde.com)

## Rubber Pin Box

Fifth wheel owners know about that harsh, jerky, chucking action that comes from towing a fifth wheel. They also recognize that some roads will just wear you out from that jerking/chucking action. They have just come to accept it as a normal part of towing.

The MORryde pin box system utilizes a unique rubber shear spring to positively deal with this rough, towing road shock. The rubber spring works in a horizontal planar motion (in a longitudinal and lateral motion) to absorb the towing shock. This allows the MORryde pin box system to effectively diminish the transfer of forces from the trailer to the truck giving you a smoother, more comfortable ride in the cab.

## Suspension Systems

When it comes to suspension performance, it's all about suspension travel. Increased travel means smoother towing, improved towability and better protection from damaging road shock. Our systems give you the smoothness you need with today's rough roads as well as the protection of your trailer from damaging road shock.

Replacement equalizers like our CRE/3000 and SRE/4000 (as shown) are just a couple of examples of our innovative suspension upgrades that we have to offer. We have systems to fit all budgets in order to protect your investment.

## Heavy Duty Shackle Kit

The constant wear and tear from rough roads and heavy loads can cause a standard shackle bracket kit on a leaf spring suspension system to simply wear out. The heavy duty shackle kit is an excellent upgrade for your running gear and the answer for wear and tear. The heavy duty kit includes 1/2" shackle brackets, bronze bushings, greaseable or "wet bolts" and nuts. The 1/2" shackle bracket is a stronger, more durable bracket that is much less subject to having the bracket elongate. The bronze bushings and wet bolts provide an opportunity for periodic lubrication that will greatly extend the product life. The heavy duty shackle kit is available for both tandem and triple axle trailers and will fit units with upgraded suspension systems.

For more information on these product as well as other great MORryde products such as various sliding trays, other suspension systems and much more, please visit our website at [www.MORryde.com](http://www.MORryde.com), or contact our Inside Sales Department at (574) 293-1581.
