Bobs

1.6 cu.ft. Stainless Steel Over-the-Range Convection Microwave Oven

Model:RV-500-OTR

Read these instructions carefully before using your microwave oven, and keep it carefully.

If you follow the instructions, your oven will provide you with many years of good service.

KEEP THESE INSTRUCTIONS CAREFULLY

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

- (a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy.It is important not to defeat or tamper with the safety interlocks.
- (b) Do not place any object between the oven front face and the door or allows soil or cleaner residue to accumulate on sealing surfaces.
- (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
 - (1) DOOR (bent)
 - (2) HINGES AND LATCHES (broken or loosened)
 - (3) DOOR SEALS AND SEALING SURFACES
- (d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

Specifications

Model:	RV-500-OTR
Rated Voltage:	120V~ 60Hz
Rated Input Power(Microwave):	1500W
Rated Output Power(Microwave):	900W
Rated Output Power(Convection):	1450W
Oven Capacity:	1.6 Cu.ft.
Turntable Diameter:	Ø 13.6 inch
External Dimensions :	29.9 X 15.0 X 15.7 inch
Net Weight:	Approx. 55.1 Lbs
Warning:	Handling the cord on this product or cords associated with accessories sold with this product will expose you to lead, a chemical known to the State of California to cause cancer, and birth defects or other reproductive harm. Wash hands after handling.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

WARNING - To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

- 1. Read all instructions before using the appliance.
- 2. Read and follow the specific: "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY" found on page 2.
- 3. This appliance must be grounded. Connect only to properly grounded outlet. See "GROUNDING INSTRUCTIONS" found on page 5.
- Install or locate this appliance only in accordance with the provided installation instructions.
- 5. Some products such as whole eggs and sealed containers for example, closed glass jars are able to explode and should not be heated in this oven.
- 6. Use this appliance only for its intended use as described in the manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use.
- 7. As with any appliance, close supervision is necessary when used by children.
- 8. Do not operate this appliance if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
- 9. This appliance should be serviced only by qualified service personnel. Contact nearest authorized service facility for examination, repair, or adjustment.
- 10. Do not cover or block any openings on the appliance.
- 11. Do not store this appliance outdoors. Do not use this product near water for example, near a kitchen sink, in a wet basement, near a swimming pool, or similar location.
- 12. Do not immerse cord or plug in water.
- 13. Keep cord away from heated surface.
- 14. Do not let cord hang over edge of table or counter.
- 15. When cleaning surfaces of door and oven that comes together on closing the door, use only mild, nonabrasive soaps, or detergent applied with a sponge or soft cloth.
- 16. To reduce the risk of fire in the oven cavity:
 - 1). Do not overcook food. Carefully attend appliance when paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
 - 2). Remove wire twist-ties from paper or plastic bag before placing bag in oven.
 - 3). If material inside of the oven ignite, keep oven door closed, turn oven off, and disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
 - 4). Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils, or food in the cavity when not in use.
- 17. Liquids, such as water, coffee, or tea are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present.

THIS COULD RESULT IN VERY HOT LIQUID SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A UTENSIL IS INSERTED INTO THE LIQUID.

To reduce the risk of injury to persons:

- 1) Do not overheat the liquid.
- 2) Stir the liquid both before and halfway through heating it.
- 3) Do not use straight-sided containers with narrow necks.
- 4) After heating, allow the container to stand in the microwave oven for a short time before removing the container.
- 5) Use extreme care when inserting a spoon or other utensil into the container.
- 18. Oversized food or oversized metal utensils should not be inserted in a microwave/ toaster oven as they may create a fire or risk of electric shock.
- 19. Do not clean with metal scouring pads. Pieces can burn off the pad and touch electrical parts involving a risk of electric shock.
- 20. Do not use paper products when appliance is operated in the toaster mode.
- 21. Do not store any materials, other than manufacturer's recommended accessories, in this oven when not in use.
- 22. Do not cover racks or any other part of the oven with metal foil. This will cause overheating of the oven.

SAVE THESE INSTRUCTIONS GROUNDING INSTRUCTIONS

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

WARNING - Improper use of the grounding can result in a risk of electric shock.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounded plug, and 3-slot receptacle that will accept the plug on the appliance. The marked rating of the extension cord shall be equal to or greater than the electrical rating of the appliance.

DANGER - Electric Shock Hazard

Touching some of the internal components can cause serious personal injury or death. Do not disassemble this appliance.

WARNING - Electric Shock Hazard

Improper use of the grounding can result in electric shock. Do not plug into an outlet until appliance is properly installed and grounded.

- 1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
- 2. Longer cord sets or extension cords are available and may be used if care is exercised in their use.
- 3. If a long cord or extension cord is used:
 - The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
 - 2) The extension cord must be a grounding-type 3-wire cord.
 - 3) The longer cord should be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over unintentionally.

RADIO INTERFERENCE

- Operation of the microwave oven may cause interference to your radio, TV or similar equipment.
- 2. When there is interference, it may be reduced or eliminated by taking the following measures:
- 1) Clean door and sealing surface of the oven
- 2) Reorient the receiving antenna of radio or television.
- 3) Relocate the microwave oven with respect to the receiver.
- 4) Move the microwave oven away from the receiver.
- 5) Plug the microwave oven into a different outlet so that microwave oven and receiver are on different branch circuits.

UTENSILS

CAUTION - Personal Injury Hazard

Tightly-closed utensils could explode. Closed containers should be opened and plastic pouches should be pierced before cooking.

See the instructions on "Materials you can use in microwave oven or to be avoided in microwave oven."

There may be certain non-metallic utensils that are not safe to use for microwaving. If in doubt, you can test the utensil in question following the procedure below.

Utensil Test:

- Fill a microwave-safe container with 1 cup of cold water (250ml) along with the utensil in question.
- 2. Cook on maximum power for 1 minute.
- Carefully feel the utensil. If the empty utensil is warm, do not use it for microwave cooking.
- 4. Do not exceed 1 minute cooking time.

SAFETY

- 1. The oven must be on a leveled surface.
- 2. The turntable and turntable roller rest must be in the oven during cooking. Place the cookware gently on the turntable and handle it carefully to avoid possible breakage.
- 3. Incorrect use of browning dish may cause the turntable to break.
- 4. Use only the specified bag size when using Direct Access Popcorn.
- 5. The oven has several built-in safety switches to ensure that the power remains off when the door is open. Do not tamper with these switches.
- 6. Do not operate the microwave oven empty. Operating the oven with no food or food that is extremely low in moisture can cause fire, charring or sparking.
- 7. Do not cook bacon directly on the turntable. Excessive local heating of the turntable may cause the turntable to break.
- 8. Do not heat baby bottles or baby food in the microwave oven. Uneven heating may occur and could cause physical injury.
- 9. Do not heat narrow-necked containers, such as syrup bottles.
- 10. Do not attempt to deep-fry in your microwave oven.
- 11. Do not attempt home canning in this microwave oven, as it is impossible to be sure all contents of the jar have reached boiling temperature.
- 12. Do not use this microwave oven for commercial purpose. This microwave oven is made for household use only.
- 13. To prevent delayed eruptive boiling of hot liquids and beverages or scalding yourself, stir liquid before placing the container in the oven and again halfway through cooking time. Let stand in the oven for a short time and stir again before removing the container.
- 14. Use carefully when cooking food in the microwave oven to avoid burning due to excessive cooking.
- 15. When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.
- 16. Failure to maintain the oven in a clean condition could lead to deterioration that could adversely affect the life of the appliance and possibly result in a hazardous situation.

Materials you can use in microwave oven

Utensils	Remarks
Aluminum foil	Shielding only. Small smooth pieces can be used to cover thin parts of meat or poultry to prevent overcooking. Arcing can occur if foil is too close to oven walls. The foil should be at least 1 inch (2.5cm) away from oven walls.
Browning dish	Follow manufacturer* instructions. The bottom of browning dish must be at least 3/16 inch (5mm) above the turntable. Incorrect usage may cause the turntable to break.
Dinnerware	Microwave-safe only. Follow manufacturer's instructions. Do not use cracked or chipped dishes.
Glass jars	Always remove lid. Use only to heat food until just warm. Most glass jars are not heat resistant and may break.
Glassware	Heat-resistant oven glassware only. Make sure there is no metallic trim. Do not use cracked or chipped dishes.
Oven cooking bags	Follow manufacturer* instructions. Do not close with metal tie. Make slits to allow steam to escape.
Paper plates and cups	Use for short*erm cooking/warming only. Do not leave oven unattended while cooking.
Paper towels	Use to cover food for reheating and absorbing fat. Use with supervision for a short-term cooking only.
Parchment paper	Use as a cover to prevent splattering or a wrap for steaming.
Plastic	Microwave-safe only. Follow the manufacturer* instructions. Should be labeled "Microwave Safe". Some plastic containers soften, as the food inside gets hot. "Boiling bags" and tightly closed plastic bags should be slit, pierced or vented as directed by package.
Plastic wrap	Microwave-safe only. Use to cover food during cooking to retain moisture. Do not allow plastic wrap to touch food.
Thermometers	Microwave-safe only (meat and candy thermometers).
Wax paper	Use as a cover to prevent splattering and retain moisture.

Materials to be avoided in microwave oven

Utensils Remarks

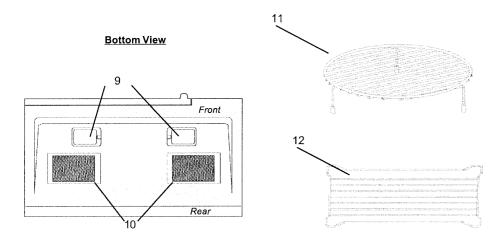

Aluminum tray	May cause arcing. Transfer food into microwave-safe dish.		
Food carton with metal handle	May cause arcing. Transfer food into microwave-safe dish.		
Metal or metal- trimmed utensils	Metal shields the food from microwave energy. Metal trim may cause arcing.		
Metal twist ties	May cause arcing and could cause a fire in the oven.		
Paper bags	May cause a fire in the oven.		
Plastic foam	Plastic foam may melt or contaminate the liquid inside when exposed to high temperature.		
Wood	Wood will dry out when used in the microwave oven and may split or crack.		

PART NAMES

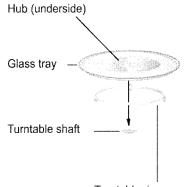

Microwave features Front View 1 Window 2 Interlock system 3 Door assembly 4 Turntable ring assembly 5 Turntable Shaft 6 Turntable glass tray 7 Control panel 8 Ventilation openings (on top) 9 Surface lights

- 11 Wire rack (use in convection and combination cooking on the removable turntable)12 Shelf (use in microwave cooking)

10 Ventilation filters

Turntable Installation

- a. Never place the glass tray upside down. The glass tray should never be restricted.
- b. Both glass tray and turntable ring assembly must always be used during cooking.
- c. All food and containers of food are always placed on the glass tray for cooking.
- d. Ifglass tray or turntable ring assembly cracks or breaks, contact your nearest authorized service center.

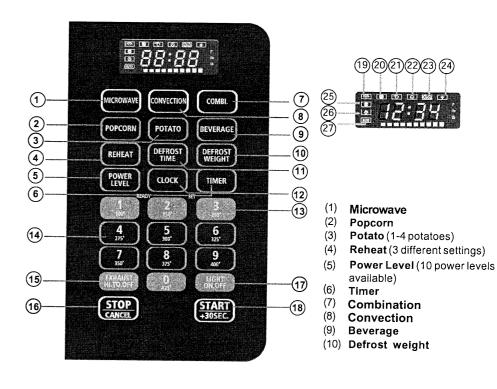

Turntable ring assembly

Countertop Installation

Remove all packing material and accessories. Examine the oven for any damage such as dents or broken door. Do not install if oven is damaged.

Cabinet: Remove any protective film found on the microwave oven cabinet surface. Do not remove the light brown Mica cover that is attached to the oven cavity to protect the magnetron.

CONTROL PANEL

- (11) Defrost Time
- (12) Clock
- (13) EasySet(3 instant key settings)
- (14) Numeric pads (0 thru 9)
- (15) Exhaust (High/Low/Off) ~ Use to turn the exhaust fan on, off, or to adjust fan speed.
- (16) Stop/Cancel
- (17) Light ON.OFF ~ Press this pad to turn the surface lights on or off.
- (18) START/+30 sec

- (19) Microwave indicator
- (20) Convection indicator
- (21) Lock indicator
- (22) Vent Fan Of Low-Speed indicator
- (23) Vent Fan Of High-Speed indicator
- (24) stove Lamp indicator
- (25) Timer indicator
- (26) Defrost indicator
- (27) Auto Cook indicator

Setting the clock

Example: setting clock display for 9:00:

- Touch Clock pad once for AM, touch twice for PM.
- 2. Enter time using number pads.
- 3. Touch Clock pad again.

Setting the timer

Example: setting timer for 5 minutes:

- 1. Touch Timer pad once.
- 2. Enter desired time using number pads
- 3. Touch Timer pad.

When the timer has reached the end of set time, you will hear beep alerts indicating the timer has run out.

Control Lock

You may lock the control panel to prevent the microwave from being accidentally started or used by children.

The control lock feature is very useful when cleaning the control panel. The lock will prevent accidental programming when wiping the control panel clean.

Example: to set the control lock ON:

Touch and hold the **Stop/Cancel** pad for more than 3 seconds. The Lock icon will appear in the display window along with 2 beeps.

Example: to change the control lock from ON to OFF:

Touch and hold the **Stop/Cancel** pad for more than 3 seconds. The Lock icon will disappear in the display window.

Using the Stop/Cancel key

This feature will let you quickly stop or cancel the cooking process.

Touch the Stop/cancel pad to:

- 1. Erase if you have entered wrong information.
- 2. Cancel timer.
- Press pad once to pause the oven temporalily during cooking.
 (Touch START/+30 sec pad again to resume cooking.)
- 4. Return the time of day (clock) to the display after cooking cycle is completed.
- 5. Cancel a program during cooking, touch twice.

Using the Start/+ 30 sec. key

This feature will let you quickly start or add 30 seconds

Touch the START/+30sec. pad to:

- Start programmed cooking.
- 2. Start cooking for 30 seconds at 100% power level.
- Extend cooking time in multiples of 30 seconds each time this pad is touched during microwave cooking.

Example: to add 1 minute of cook time during 80% microwave cooking:

Press START/+30 sec pad twice.

Note: The cooking time cannot be added in defrost, auto menu and multi-stage cooking.

MANUAL COOKING

Heating with high power level

Example: to heat for 5 minutes at 100% power:

- 1. Press Microwave pad.
- Use the number pads to enter desired heating time (cook time may be set up to 99 minutes and 99 seconds).
- 3. Touch Start/+30SEC. pad.

When heating has finished you will hear beeps

Heating with lower power levels

Using the highest power level to heat foods with does not always give the best results when some types of food need slower cooking, such as roasts, baked goods or custards. Your oven has nine other power levels you may choose.

Example: to heat for 4 minutes at 70% power:

- 1. Press Microwave pad
- Use the number pads to enter desired heating time (cook time may be set up to 99 minutes and 99 seconds).
- Press Power Level pad once for powerlevel 10 (100% power).
- Use the number key to change the power level to 7. PL7 appears in the display (70 % power).
- Press Start/+30SEC. pad.

When heating has finished you will hear beeps

Suggested power levels for cooking

The 10 power levels available with this microwave will help you to adjust to the power output best suited for the food type you are preparing. As with any food prepartion in the microwave, it is best to follow the microwave instructions that are printed on food packaging.

The table below provides suggested power levels for various types of food that you can be prepare in the microwave.

Power level	Microwave output	Use to prepare when:
10 High	100 %	Boiling water. Cooking ground beef. Making candy. Cooking fresh fruits & vegetables Cooking fish & poultry. Preheating browning dish. Reheating beverages. Cooking bacon slices.
9	90 %	Reheating meat slices quickly. Saute onions, celery & green peppers.
8	80 %	 All reheating. Cooking scrambled eggs.
7	70 %	 Cooking breads & cereal products. Cooking cheese dishes & veal. Cakes, muffins, brownies & cupcakes.
6	60 %	Cooking pasta.
5	50 %	 Cooking meats & whole poultry. Cooking custard. Cooking spare ribs, rib roast & sirloin roast.
4	40 %	Cooking less tender cuts of meat.Reheating frozen packaged foods.
3	30 %	Thawing meat, poultry & seafood. Cooking small quantities of food. Finish cooking casseroles, stew & some sauces.
2	20 %	Softening butter & cream cheese.Heating small amounts of food.
1	10 %	Softening ice cream.Raise yeast dough.

Heating with multiple cooking stages

For best results, some microwave recipes call for different power levels or different lengths of time for cooking. Your microwave may be set to change from one stage to another automatically (2 stages maximum).

Example: to cook food for 3 minutes at 80% power and then 50% power for 6 minutes 30 seconds:

- 1. Press Microwave
- Use the number pads to enter heating time for the 1st stage (cook time may be set up to 99 minutes and 99 seconds).
- 3. Press Power Level pad once.
- Use the number keys to enter power level for the 1st stage. PL8 appears in the display (80 % power).
- Press Microwave pad for 2nd stage.
- Use the number pads to enter heating time for the 2nd stage (cook time may be set up to 99 minutes and 99 seconds).
- Press Power Level pad for 2nd stage.
- Use the number key to enter power level for the 2nd stage. PL5 appears in the display (50 % power).
- 9. Press Start/+30SEC. pad.

When heating has finished you will hear beeps.

Note:

Power level must always be programmed for first stage - 100% = 10.

Suggestions for getting the best results

To help you achieve the best possible results from your microwave oven, read the following suggestions below;

Storage temperature

Foods taken from the freezer or refrigerator take longer to cook than the same foods would at room temperature.

Size

Small pieces of food cook faster than large ones. Pieces similar in size and shape will cook more evenly when cooked together. For more even results, reduce the power levels when cooking large pieces of food.

Natural moisture

Very moist foods cook more evenly because microwave energy heats water molecules very efficiently.

Stirring

Stir foods such as casseroles and vegetable from the outside to the center to distribute the heat more evenly. This will allow the food to cook faster. Constant stirring is not necessary.

Turn over items

Turn over foods such as pork chops, roasts or whole cauliflower halfway through the cook time. This will help to expose all sides equally to microwave energy.

Food placement

Place delicate areas of food items, such as asparagus tips, toward the center of the turntable tray.

Food arrangement

Arrange unevenly shaped foods, such as chicken pieces or salmon, with the thicker or meatier parts toward the outside of the turntable tray.

· Let the food stand

After removing the food from the microwave, cover the food with foil or a casserole lid and let it stand to finish cooking. This will help the food finish in the center and avoids overcooking the out edges, The length of stand time depends on the density and surface area of the food items.

Wrapping in paper towels or waxed paper Sandwiches and many other food types containing pre baked bread should be wrapped prior to placing in the microwave to help prevent the food items fro drying out while heating.

MANUAL COOKING

Using Ready Set

2

Microwave heating or cooking may be quickly set at 100% power level for 1, 2 or 3 minutes. Use the number keys 1, 2 or 3 to choose the desired minutes of cook time (this option will only work using the 1, 2 or 3 numeric pads):

Example: to quickly heat for 2 minutes at 100% power:

Touch number pads 1, 2 or 3 for desired minutes of cook time.

Exhaust High / Low / Off

The exhaust ventilation moves steam and other cooking vapors from the cooking surface of the range below the microwave oven.

To operate the exhaust vent, Touch the **Exhaust HI.TO.OFF** pad once for the highest speed setting. Touch the pad again to choose the Low speed setting and a 3rd time to turn the exhaust ventilation off.

Note: If the temperature gets too hot around the microwave oven, the fan in the exhaust vent hood will automatically turn on at the LOW setting to cool the oven. The will automatically turn off when the internal parts are cool. When this occurs, the vent cannot be turned off.

Surface Light / On / Off

Touch the **Light/On/Off** pad once for a cooking surface light. Press the pad again to turn the light off.

Setting Defrost by Weight

Example: to defrost 1lb. of food with the default power level and cook time determined automatically:

- Press **Defrost Weight** pad once.
 will appear in the display.
- Use the numeric pads to input weight of food to defrost in pounds (10 = 11b.) You may enter any weight from 0.1 to 6.0lbs.
- 3. Press START/+30sec. pad.

When defrosting has finished you will hear beeps.

Note: The weight amount must be a valid entry for this feature to start. A valid weight entry is 0.1 to 6.0 pounds.

Setting Defrost by Time

Example: to defrost food with the default 30% power level for 5 minutes:

- Press **Defrost Time** pad once.
 0:00 will appear in the display.
- Use the number pads to enter desired defrost time (defrost time may be set up to 99 minutes and 99 seconds).
- 3. Press Start/+30SEC. pad.

When heating has finished you will hear beeps.

Note: Power levels cannot be changed for both defrost (by weight) or defrost (by time) because the defrost performance will be adversely affected.

Special notes for defrosting by time

- After pressing Start/+30SEC. key, the display will count down remaining defrost time. The oven will beep twice during the defrost cycle. At this time open the door and turn the food if needed and remove any portions that have already thawed. Touch the Start/+30SEC. key to resume the defrost cycle.
- · When heating has finished you will hear beeps.

Defrosting tips

- When using the defrost weight feature, the weight entered should always be pounds (valid entries are from 0.1 to 6.0 pounds).
- Use both defrost weight and defrost time features for raw food items only. Defrosting gives best results when food to be thawed is a minimum of 0°F (taken directly from a true freezer). If the food has been stored in a refrigerator-freezer that does not maintain a temperature of 5°F or below, always program a lower food weight or lower cook time to prevent cooking the food.
- If the frozen food is stored outside the freezer for up to 20 minutes, enter a reduced cook time or weight.

- The shape of the package will alter the defrosting time.
 Shallow rectangular food packets defrost more quickly than a deep frozen block of food.
- Separate pieces as they begin to defrost. Separated frozen pieces of food defrost better.
- Shield warm areas of food with small pieces of foil if they start to become warm.
- You may use small pieces of aluminum foil to shield food items like chicken wings, leg tips and fish tails, but do not allow the foil to touch the oven cavity walls when defrosting.

Defrosting suggestions for meats

For best results, please read these suggestions when defrosting meats.

Meat	Normal amount	Suggestions	
Roast beef or pork	2.5 to 6 lbs. (40 to 96 oz.)	Start with the food placed fat side down. After each stage, turn the food over and shield any warm portions with narrow strips of aluminum foil. Let stand, covered for 15-30 minutes.	
Steaks, chops or fish	0.5 to 3 lbs. (8 to 48 oz.)	After each stage, rearrange the food. If there are any warm or thawed portions of food, shield them with narrow flat pieces of aluminum foil. Remove any pieces of food that are nearly defrosted. Let stand, covered for about 5 to 10 minutes.	
Ground meat	0.5 to 3 lbs. (8 to 48 oz.)	After each stage, remove any pieces of food that are nearly defrosted. Let stand, covered with foil for 5 to 10 minutes.	
Whole chicken	2.5 to 6 lbs. (40 to 96 oz.)	Remove giblets before freezing poultry. Start defrsoting with the breast side down. After the 1st stage, turn the chicken over and shield any warm portions with narrow strips of aluminum foil. After the 2nd stage, again shield any warm portions with narrow strips of aluminum foil. Let stand, covered, for 30 to 60 minutes in the refrigerator.	
Chicken pieces	0.5 to 3 lbs. (8 to 48 oz.)	After each stage, rearrange or remove any pieces of food that are nearly defrosted. Let stand for 10-20 minutes.	

MANUAL COOKING

Reheat

The reheat feature provides 3 quick preset settings based on serving size to reheat food for your cooking convenience.

Example: to reheat 24 ounces of food.

 Press Reheat pad 3 times to reheat 24oz. of food. 24.00oz will appear in the display (see reheat category table).

Reheat Category	Press	Display
8 ounces of food	once	8.00 oz
16 ounces of food	twice	16.00 oz
24 ounces of food	3 times	24.00 oz

2. Press Start/+30SEC. pad.

Reheat cooking suggestions

Reheat	Directions	Amount
Dinner plate	Use only pre-cooked, refrigerated foods. Cover plate with vented plastic wrap or waxed paper, tucked under plate. If food is not as hot as you prefer after heating with Reheat, continue heating using manual time and power level settings. Contents: • 3-4 oz. meat, poultry or fish (up to 6 oz. with bone) • ½ cup starch (potatoes, pasta, rice, etc.) • ½ cup of vegetables (about 3-4 oz.)	1 serving (1 plate)
Casserole	Cover plate with lid or vented plastic wrap. If food is not as hot as you prefer after heating with Reheat , continue heating using manual time and power level settings.	1 to 4 servings
Pasta	Stir foods once before serving.	
	Contents: • Casserole-refrigerated foods (for example beef stew or lasagna) • Pasta-Canned spaghetti and ravioli, refrigerated foods.	

CONVECTION Cooking

There are ten temperatures of convection:100F,150F, 250F, 275F,300F,325F,350F,375F, 400F,425F.

Convection cooking uses a heating element to raise the temperature of the air inside the oven. Any oven temperature from 100°F to 425°F may be set. A fan gently circulates this heated air throughout the oven, over and around the food, producing golden brown exteriors and rich, moist interiors.

Because the heated air is kept constantly moving, not permitting a layer of cooler air to develop around the food, some foods cook faster than in regular oven cooking.

For Best Results...

Always use the shelf when convection cooking. Reduce package/recipe temperature 25°F for baked goods. The shelf is required for good air circulation and even browning.

Using CONVECTION With preheating

Example: to cook food for 5 minutes at 250°F using **Convection** with preheating

- 1. Press Convection pad once.
- Press the temperature key to select the temperature you need. Do not enter cook time now. (The cook time will be entered later, after the oven is preheated.)
- Press Start/+30SEC.pad to start preheating. (When the oven is preheated, it will signal.)
- Place the food in the oven. Press the number keys to set cooking time (If you do not enter the cooking time within 20 minutes the oven will turn off automatically)
- 5 press " Start/+30SEC. " to start cooking. When cooking is complete, the oven will signal and turn off.

Using CONVECTION Without preheating

Example: to cook food for 5 minutes at 250°F using **Convection** without preheating

 If your recipe does not require preheating, press the Convection pad once,

- 2. Press the temperature key to select the temperature you need.
- 3. Press **Convection** to confirm the temperature.
- Press the number keys to set cooking time.
- Press the " Start/+30SEC. "pad to start the oven

Combination Cooking

Combination Cooking offers the best features of microwave energy and convection cooking. Microwaves cook food fast and convection circulation of heated air browns foods beautifully. Any oven temperature from 100°F to 425°F may be set.

For Best Results...

Always use the shelf when combination cooking. The shelf is required for good air circulation and even browning.

Microwave +convection Combination Cooking

Example: to cook food for 5 minutes using combination cooking.

- 1. Press COMBI. pad once.
- 2. Press the number keys to set cooking time.
- 3. Press Start/+30SEC. pad to start cooking.

Notes:

- Check the Cookware Tips section for correct cookware when Combination Cooking
- Do not use metal cookware when Combination Cooking
- Place meat on a trivet in a glass dish to collect juices and prevent spattering.
- For best roasting and browning results, whole roasts should be cooked in a glass dish placed directly on the oven shelf.
- For foods that are too tall to fit in the oven, you can leave out the trivet. If necessary, you may take out the shelf and place the dish directly on the turntable.

MANUAL COOKING

Popcorn

A CAUTION

 DO NOT leave micowave oven unattended while popping corn.

The popcorn feature lets you pop 3 different commercially packaged microwave popcorn sized bags. Use the table below to determine the setting to use.

Amount	Press popcorn pad
1.75 oz. (default setting)	once
3.00 oz.	2 times
3.50 oz.	3 times

Example: to pop a 3.0 oz. bag of popcorn automatically.

- 1. Press **Popcorn** pad (1, 2 or 3 times refer to table above to change for bag size).
- 2. Press Start/+30SEC. pad.

The microwave will beep when finished.

Potato

The potato feature cooks 1, 2,3 or 4 (cooking times based on 8 to 32 oz.) potatoes automatically. Use the table below to determine the setting to use.

Amount	Press potato pad
1 potato (default setting)	once
2 potatoes	2 times
3 potatoes	3 times
4 potatoes	4 times

Example: to cook 1 potato automatically.

- 1. Press **Potato** pad (1, 2,3 or 4 times refer to table above to change quantity).
- 2. Press Start/+30SEC. pad.

The microwave will beep when finished.

Notes:

- Before cooking, pierce potatoes with fork several times.
- · After cookings, let potatoes stand for 5 minutes.

Beverage

The beverage feature heats 1, 2 or 3 cups of beverage. Use the table below to determine the setting to use.

Press beverage pad	
once (default setting)	
2 times	
3 times	

Example: to heat 1 cup of a beverage.

- Press Beverage pad (1, 2 or 3 times refer to table above to change number of servings).
- 2. Press Start/+30SEC. pad.

The microwave will beep when finished.

AUTO COOKING

Convenience cooking suggestions

Convenience category	Amount	Suggestions
Popcom	1.75,3.0, 3.5 oz. 1 pkg.	Cook a single "microwave-only" bag of popcorn at a time. Use caution when removing and opening the hot popcorn bag from the oven. Let microwave oven cool down at least 5 minutes before using again.
Potato	1,2,3,4 potatoes 8,16,24 32 oz.	Pierce each potato several times using a fork. Place on turntable in spoke-like fashion. After cooking, let stand for 3-5 minutes. Let oven cool for at least 5 minutes before using again. Use the start/+30sec pad to increase cook time for larger potatoes.
Beverage	1,2,3 cups (8 oz,16 oz 24 oz.)	Use a microwave-safe measuring cup or mug; do not cover. Place the beverage in the microwave. After heating, stir well. Let oven cool for at least 5 minutes before using again. Beverages heated with the beverage category may be very hot. Remove the container with care.

CLEANING AND CARE

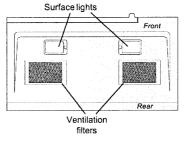

Disconnect the power cord before cleaning or leave the door open to deactivate the oven during cleaning.

Cleaning the exhaust filters

The oven ventilation exhaust filters should be removed and cleaned often; generally at least once every month.

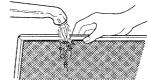

A CAUTION

To avoid risk of personal injury or property damage, do not operate oven hood without filters properly in place.

 To remove the exhaust ventilation filters, slide the filter to the rear. Then pull filter downward and push to the other side. The filter will drop out. Repeat for the 2nd filter.

Soak the ventilation filters in hot water using a mild detergent. Rinse well and shake to dry or wash in a dishwasher. Do not use ammonia. The aluminum on the filter will corrode and darken.

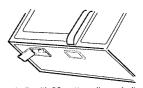

To reinstall the exhaust ventilation filter, slide it into the side slot, then push up and toward oven to lock. Reinstall the 2nd filter using the same procedure.

Surface light replacement

A CAUTION

To avoid risk of personal injury or property damage, wear gloves when replacing the light bulbs.

- 1. Unplug the microwave oven or turn off power at the main circuit breaker.
- 2. Remove the bulb cover mounting screws at both light positions under the microwave.

- 3. Replace bulb with 30 watt appliance bulb.
- 4. Re-install bulb cover and mounting screw.
- 5. Plug the microwave back into the power supply or turn the power back on at the main circuit breaker.

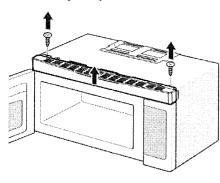

CLEANING AND CARE

Disconnect the power cord before cleaning or leave the door open to deactivate the oven during cleaning.

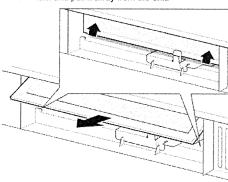

Charcoal filter replacement

Charcoal Filter installed in your microwave oven, is used for nonvented, recirculated installation. The filter should be changed every 6 to 12 months depending on use.

- 1. Disconnect power to the microwave oven at the circuit breaker panel or by unplugging.
- 2. Remove the vent grill mounting screws.
- 3. Pull the vent grill away from the unit.

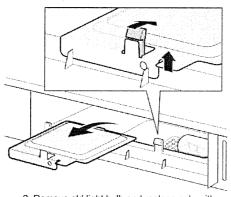

4.Remove the charcoal filter by pushing it inwards, then turn and pull it away from the unit.

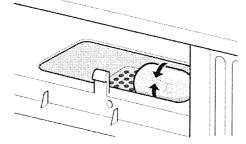

Oven light replacement

Remove the vent grill per instructions 1-4 above and charcoal filter, if used.

 Open light cover located behind filter mounting by carefully pulling up on the front edge.

Remove old light bulb and replace only with equivalent 30 watt bulb available from parts distributor. Bulbs are also available at most hardware stores or lighting centers.

Note: DO NOT USE BULB LARGER THAN 30 WATTS.

 Replace the microwave oven light cover by carefully pushing into place. Replace the charcoal filter. Push the vent grill back into place (engaging both the bottom and top tabs) and replace the vent grill mouting screws.

CLEANING AND CARE

Disconnect the power cord before cleaning or leave the door open to deactivate the oven during cleaning.

Cleaning suggestions

For best performance and for safety reasons, keep the oven clean inside and outside. Take special care to keep the inner door panel and oven fron frame free of food and grease build-up.

Never use rough scouring powder or pads on the microwave. Wipe the microwave oven inside and out with a soft cloth and and warm (not hot) mild detergent solution. Then rinse and wipe completely dry.

Wipe spatters immediately with a wet paper towel, especially after cooking greasy foods like chicken or bacon.

Clean your microwave oven weekly or more often, if needed.

Follow these instructions to clean and care for your microwave oven:

- Keep the inside (cavity) of the oven clean. Food particles and spilled liquids can stick to the oven walls, causing the oven to work less efficiently.
- Wipe up spills immediately. Use a damp, clean cloth and mild soap. DO NOT use harsh detergents or abrasive cleaners.
- To help loosen baked-on food particles or liquids, heat 2 cups of water (add the juice of 1 lemon if you desire to keep the oven fresh smelling) in a 4 cup measuring glass at High power for 5 minutes or until boiling. Let stand in oven cavity for 1 or 2 minutes.
- Remove the glass turntable tray from the oven when cleaning the oven cavity or tray. To prevent the glass turntable from breaking, handle with care and do not put it in water immediately after cooking. Wash the turntable tray in warm sudsy water or in the dishwasher.
- Clean the outside surface of the microwave with soap and a clean damp cloth. Dry with a clean soft cloth. To prevent damage to the operating parts of the oven, do not let water seep into any vents or openings.
- Wash the oven door window with very mild soap and water. Be sure to use a soft clean cloth to avoid scratching.

- If steam accumulates inside or outside the oven door, wipe with a soft cloth. Steam can accumulate when operating the oven in high humidity and in no way indicates microwave leakage.
- Never operate the oven without food in the oven cavity; this can damage the magnetron tube or glass tray. You may wish to leave a cup of water standing inside the oven when it is not in use to prevent damage if the oven is accidentally turned on.

How to Clean the Inside

Walls, Floor, Inside Widow, Metal and Plastic Patrs on the Door.

Some spatters can be removed with a paper towel, others may require a damp cloth. Remove greasy spatters with a sudsy cloth, then rinse with a damp cloth. Do not use abrasive cleaners or sharp utensils on oven walls.

To clean the surface of the door and the surface of the oven that come together upon closing, use only mild, non-abrasive soaps or detergents using a sponge or soft cloth. Rinse with a damp cloth and dry.

Never use a commercial oven cleaner on any part of your microwave.

Removable Turntable and Turntable Support

To prevent breakage, do not place the turntable into water just after cooking. Wash it carefully in warm, sudsy water or in the dishwasher. The turntable and support can be broken if dropped. Remember, do not operate the oven without the turntable and support in place.

How to Clean the Outside

Do not use cleaners containing ammonia or alcohol on the microwave oven. Ammonia or alcohol can damage the appearance of the microwave.

Case

Clean the outside of the microwave with a sudsy cloth. Rinse with a damp cloth and then dry. Wipe the window clean with a damp cloth.

CLEANING AND CARE

Disconnect the power cord before cleaning or leave the door open to deactivate the oven during cleaning.

Control Panel and Door

Wipe with a damp cloth. Dry thoroughly. Do not use cleaning sprays, large amounts of soap and water, abrasives or sharp objects on the panel—they can damage it. Some paper towels can also scratch the control panel.

To clean stainless steel surfaces, use a hot, damp cloth with a mild detergent suitable for stainless steel surfaces. Use a clean, hot,damp cloth to remove soap. Dry with a dry, clean cloth.

Door Surface

It is important to keep the area clean where the door seals against the microwave. Use only mild, non-abrasive detergents applied with a clean sponge or soft cloth. Rinse well.

Power Cord

If the cord becomes soiled, unplug and wash with a damp cloth. For stubborn spots, sudsy water may be used, but be certain to rinse with a damp cloth and dry thoroughly before plugging cord into outlet.

Stainless Steel

Do not use a steel-wool pad; it will scratch the surface.

Maintenance

Troubleshooting

Check your problem by using the chart below and try the solutions for each problem. If the microwave oven still does not work properly, contact the nearest authorized service center.

TDOUBLE	POSSIBLE CAUSE	POSSIBLE REMEDY
TROUBLE		
Oven will not start	a. Electrical cord for oven is not plugged in.b. Door is open.c. Wrong operation is set.	a. Plug into the outlet. b. Close the door and try again. c. Check instructions.
Arcing or sparking	 a. Materials to be avoided in microwave oven were used. b. The oven is operated when empty. c. Spilled food remains in the cavity. 	a. Use microwave-safe cookware only. b. Do not operate with oven empty. c. Clean cavity with wet towel.
Unevenly cooked foods	 a. Materials to be avoided in microwave oven were used. b. Food is not defrosted completely. c. Cooking time, power level is not suitble. d. Food is not turned or stirred. 	a. Use microwave-safe cookware only.b. Completely defrost food.c. Use correct cooking time, power level.d. Turn or stir food.
Overcooked foods	Cooking time, power level is not suitable.	Use correct cooking time, power level.
Undercooked foods	 a. Materials to be avoided in microwave oven were used. b. Food is not defrosted completely. c. Oven ventilation ports are restricted. d. Cooking time, power level is not suitable. 	 a. Use microwave-safe cookware only. b. Completely defrost food. c. Check to see that oven ventilation ports are not restricted. d. Use correct cooking time, power level.
Improper defrosting	a. Materials to be avoided in microwave oven were used.b. Cooking time, power level is not suitable.c. Food is not turned or stirred.	a. Use microwave-safe cookware only. b. Use correct cooking time, power level. c. Turn or stir food.

CONTOURE Limited Warranty

REGISTER ONLINE. IT'S QUICKY AND EASY! www.ContoureUSA.com

Warranty registration is not mandatory, but doing so will help us to service you more quickly if you need to present a warranty claim. Please go online to complete and return this warranty registration to us.

National Brands LLC. warrants this CONTOURE product ("product") to be free of all defects in material and workmanship for the applicable period specified below commencing from the date of original purchase. This Warranty extends to the original buyer only.

Ninety (90) Day Full Warranty: Within ninety (90) days from the date of original purchase, National Brands LLC. in its sole discretion, will either repair or replace, free of charge, any part proving defective in material or workmanship. All warranty repairs and service must be performed at a National brands LLC. location of service by an authorized National brands LLC. technician. All expenses related to replacing or repairing a defective part under this ninety (90) day warranty shall be assumed by National Brands LLC., except the cost of transporting the product to and from National Brands LLC., which shall be assumed by the buyer. If the product is replaced, the replacement will be with a product that is identical or equivalent to the warranted product. If the product cannot be repaired or replaced, National brands LLC. will issue a refund to the buyer for the original purchase price less that amount directly attributable to use by the buyer.

One (1) Year Limited Warranty: After the expiration of the ninety (90) day warranty, and within one (1) year from the date of original purchase, National Brands LLC. will replace any part proving defective in material or workmanship with a product that is identical or equivalent to the warranted part. The buyer shall assume the cost of transporting the defective product to and from National Brands LLC. If the product cannot be replaced, National Brands LLC. will issue a refund to the buyer for the original purchase price less that amount directly attributable to use by the buyer.

Warranty Exclusions: This warranty does not apply to any costs, repairs or services for the following: -Service calls to correct the installation of the warranty-covered products, to explain the usage of the product to the buyer, or to reset or replace home circuit breakers or fuses

- -Repairs necessitated by use other than normal home use
- -Damage resulting from misuse, abuse, accidents, alternations, improper installation, fire, flood acts of God or damage caused by the shipping of the product by the buyer to National Brands LLC.
- -Corrective work necessitate by repairs made by anyone other than a National Brands LLC. authorized service technician
- -Costs incurred for disposing the product at locations other than a National Brands LLC. facility

Hot to Obtain Warranty Service: Upon discovery of any defect, malfunction, or nonconformity in the warranty-covered product, the buyer should visit www.ContoureUSA.com and complete the warranty service request form online.

Notice to Buyer: This warranty gives the buyer specific legal rights, and the buyer may also have other rights which vary from state to state. You have the right to bring any action at law or equity to resolve disputes concerning or to enforce the provisions of this warranty. Every implied warranty, including any statutory warranty or condition of merchantability or fitness for a particular purpose, is disclaimed except to the extent prohibited by law, in which case such warranty or condition is limited to the duration and extent of this written warranty.

Inquiries: If buyer has any questions concerning CONTOURE's product warranty please visit: $\underline{www.ContoureUSA.com}$

Thank you again for purchasing your CONTOURE product!
