

## **Guide for Using DIRECTV® SWM Technology with Winegard® Mobile Satellite TV Antennas**

**For up-to-date information on receiver compatibility & programming, visit [www.winegard.com/receivers](http://www.winegard.com/receivers)**

# Receivers Compatible with SWM Technology

Winegard mobile satellite TV antennas that operate with Multi-switch technology require separate accessories to operate with DIRECTV Single Wire Multi-switch (SWM) only technology receivers. For an up-to-date list of DIRECTV DVR and non-DVR receiver models that are only compatible with SWM technology, visit [www.winegard.com/directv](http://www.winegard.com/directv). This website also lists Winegard mobile satellite TV antennas that are compatible with DIRECTV. If unsure of your receiver model, check the back of the receiver or the inside front door of the smart card slot.

Model number

## SWM Kit Parts

For proper SWM operation with Winegard satellite TV antennas that operate with Multi-switch technology, the SWM8, DIRECTV PI-28 or PI-29 power supply, and DIRECTV approved splitter (typically 2, 4, or 8 port) must be used. Failure to use this equipment may cause issues with your system. Note that Model SK-SWM3 SWM TRAV'LER® antenna operates with DIRECTV SWM technology without separate accessories.

The DIRECTV power inserter PI-28 or PI-29 may damage a DIRECTV receiver if improperly connected in the system. The SWM output of the power inserter should never be directly applied to the input of a receiver. During installation, verify all wiring before applying power to the power inserter.

## Calculating Tuners for SWM Installation

DIRECTV SWM8 allows the use of up to eight tuners with a Winegard satellite antenna. Count the tuners in your SWM installation to check that there are less than or equal to eight tuners being used with SWM8. Keep in mind the following when counting the number of tuners:

- A non-DVR receiver counts as one tuner.
- A DVR receiver has dual tuners and counts as two tuners (even though only one coaxial cable is needed to connect to a DVR receiver). The exceptions are the DIRECTV Genie™ and HR34 DVR receivers, which have five tuners and count as five tuners when calculating tuners for a SWM installation.

**Number of non-DVR receivers + 2 x Number of DVR receivers = Total tuners for SWM8 installation**

Maximum of 8 non-DVR receivers

Maximum of 4 DVR receivers

Total tuners ≤ 8 for SWM8 installation

### Example

Two non-DVR receivers and three DVR receivers are being used for a SWM8 installation.

2 non-DVR receivers + 2 x 3 DVR receivers = 8 total tuners for SWM installation

## Warnings

- Never use B-Band converters with SWM8.
- Do not use a DIRECTV PI-21 power inserter with a SWM8. Use a DIRECTV power inserter PI-28 or PI-29.
- Never power on all receivers at once. Sequentially power receivers since every receiver must get a SWM assignment.
- The power inserter must be installed inside the vehicle.
- Never use a regular splitter. Only use a DIRECTV approved splitter.

# Winegard Mobile Satellite TV Antennas that Require Separate Accessories to Operate with SWM Technology

Antennas	Sat 99°♦	Sat 101°	Sat 103°	Sat 110°	Sat 119°	Wiring diagram
 TRAV'LER SK-3005 DIRECTV Slimline	✓	✓	✓	✓	✓	See page 3 for a SWM8 installation, pages 7–10 for an SK-3005 combined with a dome antenna***, or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.
 TRAV'LER SK-3003 DIRECTV Triple LNB		✓		✓**	✓**	See pages 11–12 for two wiring options for a SWM8 installation or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.
 Carryout® automatic & G2, RoadTrip® Mission® & MiniMax™, and DuraSAT®		✓*				See page 5 for a SWM8 installation with dome antennas or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.
 Carryout Anser®		✓*				See page 6 for a SWM8 installation or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.
 Carryout MP1™		✓*				See page 13 for a SWM8 installation or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.
 Crank-ups, Dish & Tripod Kits (TR-6018, PM-2000)		✓*				See page 14 for a SWM8 installation or page 4 for a SWM8 installation using SWM1 & SWM2 outputs. See page 15 for receiver settings.

\*DIRECTV primary 101 programming only. Toggling to alternate satellites is not supported.

\*\*Availability of channels on Satellites 110 and 119 is dependent upon the satellite port to which Port C of the TRAV'LER interface is connected.

\*\*\*Each antenna will see satellites as listed in the above table. Note that additional parts (not included) are needed for the combined setup of the TRAV'LER antenna and domed antenna with SWM technology.

♦There is a second 99° satellite called the 4K Ultra High HD.

# SK-3005 TRAV'LER Antenna with DIRECTV SWM8

**Alternate setup:** The splitter may also be installed between the power inserter and the SWM8 switch.

# DIRECTV SWM8 Using Both SWM1 & SWM2 Outputs

The wiring diagram below applies to all Winegard satellite TV antennas that require separate accessories to operate with SWM technology. This wiring setup does not work with whole-home DVR setup. Model SK-3005 TRAV'LER antenna is shown below.

**Alternate setup:** The splitter may also be installed between the power inserter and the SWM8 switch.

# Dome Antenna with DIRECTV SWM8

The wiring diagram below applies to dome antennas, including the Carryout GM-1518 & GM-1599, Carryout G2, RoadTrip Mission & MiniMax, and DuraSAT antennas. The diagram applies to both stationary and tracking models. Model GM-1518 Carryout automatic antenna is shown below.

If using an HD receiver with a dome antenna, change the preferences setting in the Display menu to "Hide all HD Channels." Otherwise, the antenna will appear to not be working since the receiver guide will only show HD channels.

**Alternate setup:** The splitter may also be installed between the power inserter and the SWM8 switch.

# Carryout Anser Antenna with DIRECTV SWM8

If using an HD receiver with the Anser antenna, change the preferences setting in the Display menu to "Hide all HD Channels." Otherwise, the antenna will appear to not be working since the receiver guide will only show HD channels.

**Alternate setup:** The splitter may also be installed between the power inserter and the SWM8 switch.

# SK-3005 TRAV'LER Antenna with Dome Antenna

## Wiring Version 1

Set the Dish Type to 04: Slimline-5, and set the Switch Type to 01: SWM. For more information on receiver setup and complete step-by-step instructions, refer to your product manual, or go online to <http://www.winegard.com/receivers/setupguide.php>.

When the receiver settings above are used with the SK-3005 TRAV'LER antenna, all HD and SD programming will be available. The same receiver settings will also work for the dome antenna but will display the "Searching for Signal" message on HD channels. To remove the "Searching for Signal" message, change the preferences setting in the Display menu to "Hide all HD Channels" when in dome operation. However, the receiver would need to be changed back to "Display All Channels" or "Hide All SD Duplicates" when changing back to TRAV'LER SK-3005 mode.

**NOTE** It may take several minutes for the DIRECTV receiver to load HD channels or to purge HD channels from the channel guide.

### A/B Switch (75 ohm) Specifications

- Frequency Range (DC): 2250 MHz.
- Current Capacity:  $\geq 2A$
- Isolation:  $> 25$  dB
- Insertion Loss:  $< .25$  dB
- Return Loss:  $\geq 11$  dB or VSWR  $\leq 2:1$

Only one A/B switch (not included) is required for operation. The A/B switch must meet the specifications above.

SWITCH SETTINGS	
A	← ----- → TRAV'LER Antenna
B	← ----- → Dome Antenna

\*Receivers in diagram can be non-DVR or DVR receivers.

**Non-DVR Receiver\***

**DVR Receiver\***

Terminate unused splitter outputs with a 75 ohm termination cap.

If connecting to a DVR receiver, do not connect a coaxial cable to the Satellite 2 input. With SWM, only connect to the Satellite 1 port (labeled FTM or SWM).

**DC Power Pass**

# SK-3005 TRAV'LER Antenna with Dome Antenna

## Wiring Version 2

Set the Dish Type to 04: Slimline-5, and set the Switch Type to 01: SWM. For more information on receiver setup and complete step-by-step instructions, refer to your product manual, or go online to <http://www.winegard.com/receivers/setupguide.php>.

When the receiver settings above are used with the SK-3005 TRAV'LER antenna, all HD and SD programming will be available. The same receiver settings will also work for the dome antenna but will display the "Searching for Signal" message on HD channels. To remove the "Searching for Signal" message, change the preferences setting in the Display menu to "Hide all HD Channels" when in dome operation. However, the receiver would need to be changed back to "Display All Channels" or "Hide All SD Duplicates" when changing back to TRAV'LER SK-3005 mode.

**NOTE** It may take several minutes for the DIRECTV receiver to load HD channels or to purge HD channels from the channel guide.

## A/B Switch (75 ohm) Specifications

Frequency Range (DC): 2250 MHz

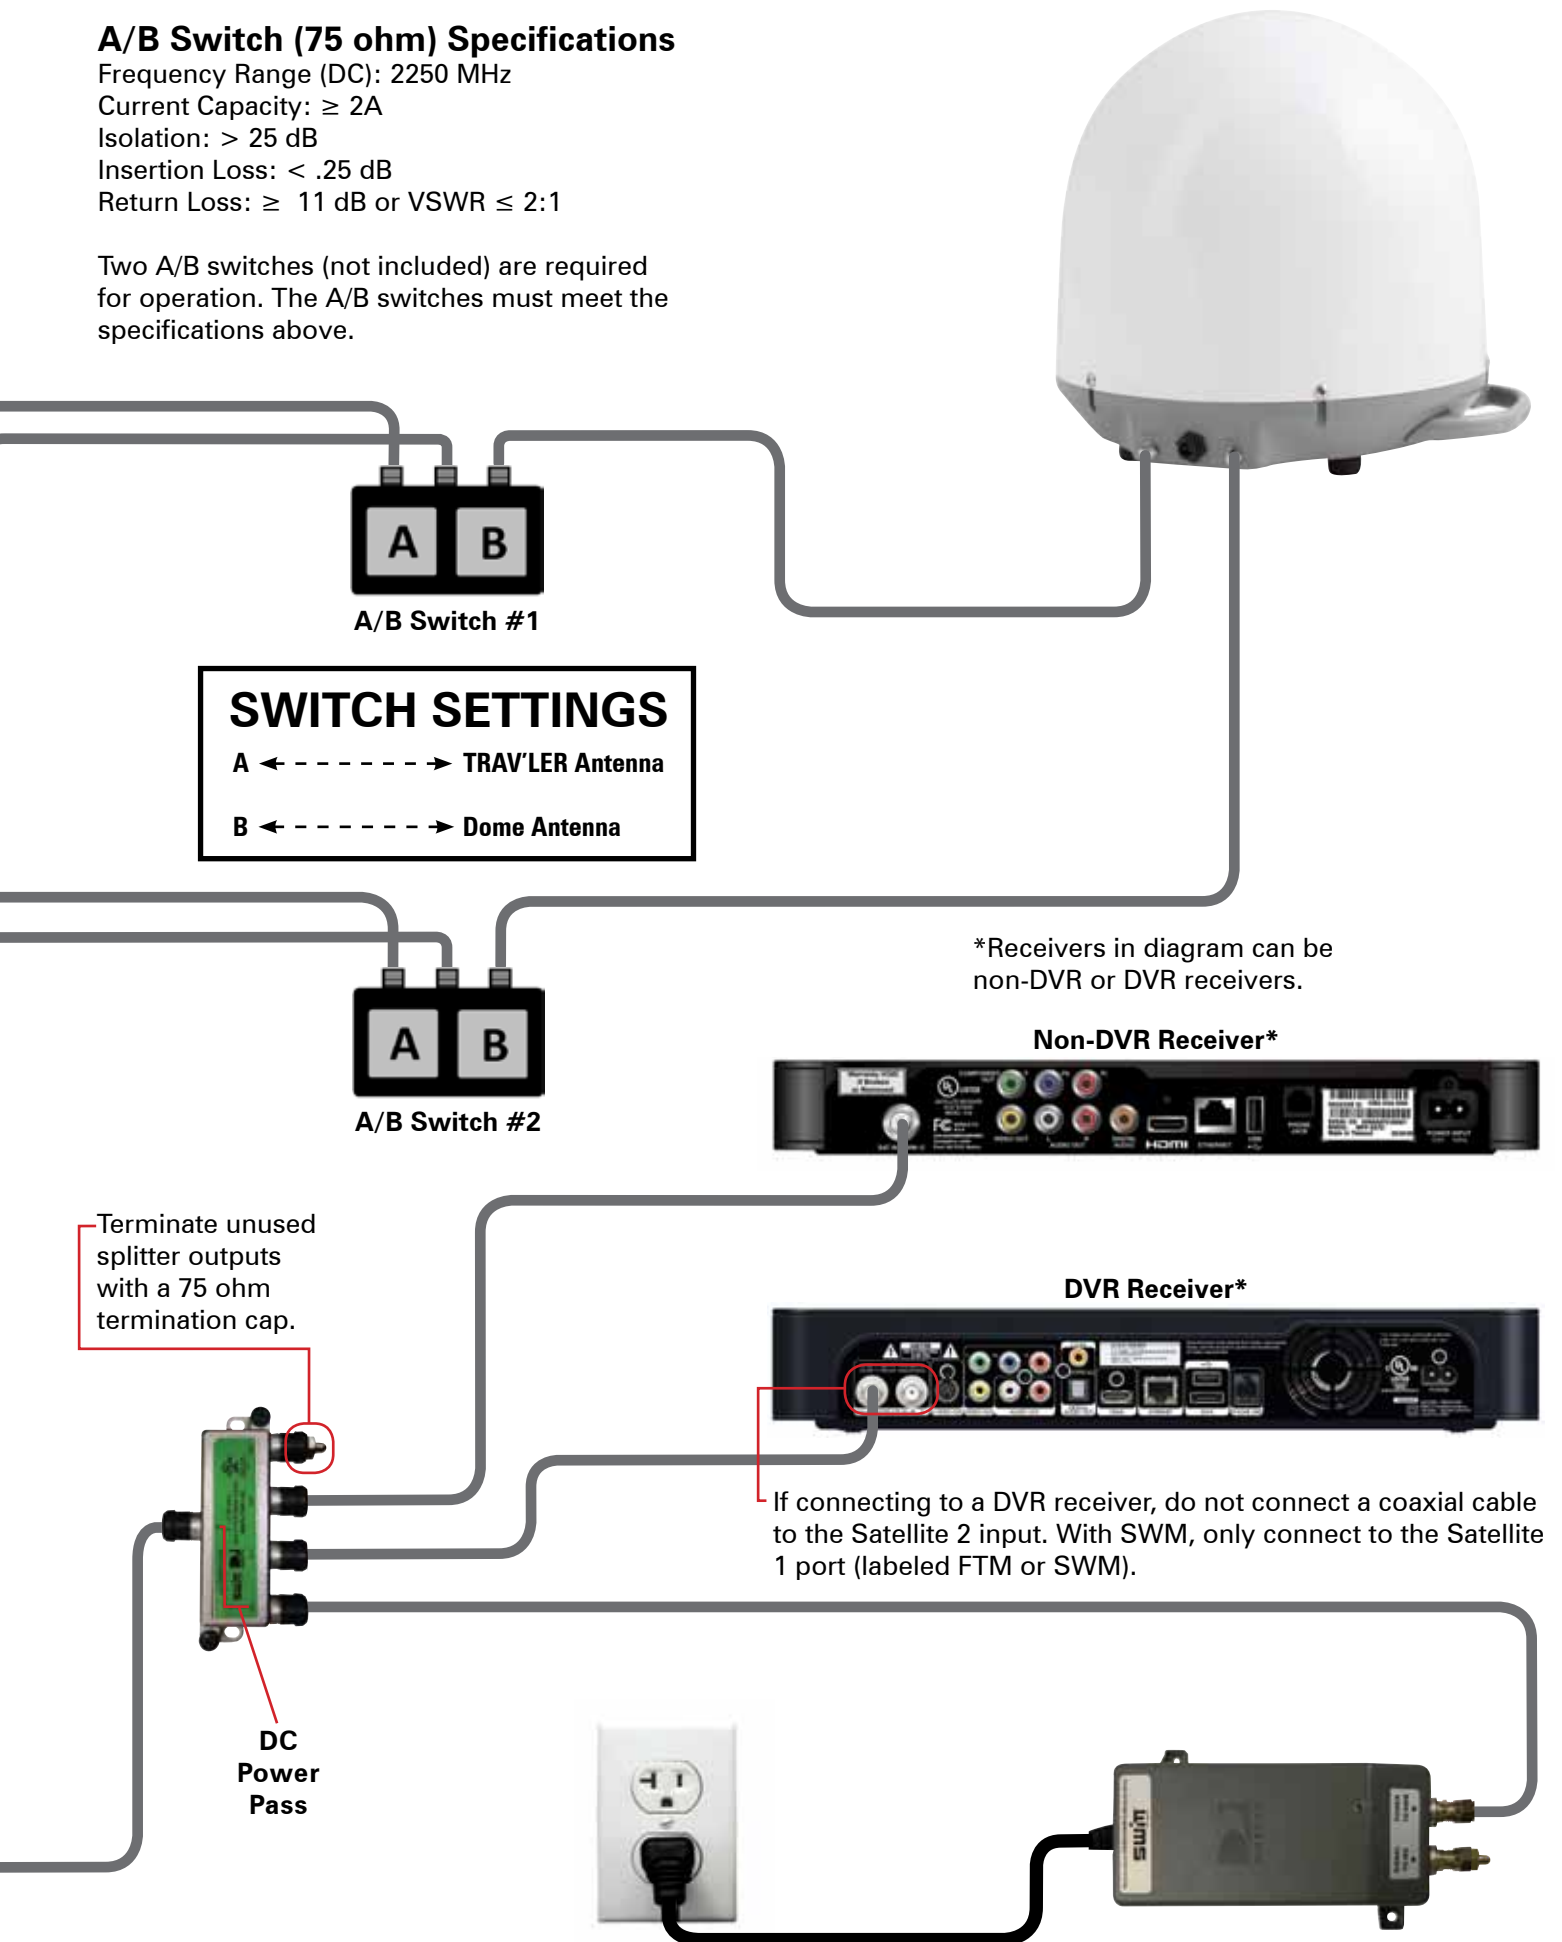

Current Capacity:  $\geq 2A$

Isolation:  $> 25$  dB

Insertion Loss:  $< .25$  dB

Return Loss:  $\geq 11$  dB or VSWR  $\leq 2:1$

Two A/B switches (not included) are required for operation. The A/B switches must meet the specifications above.

# Carryout MP1 Antenna with DIRECTV SWM8

For access to 101° satellite programming, connect the primary and secondary ports of the antenna (located behind the reflector) to both SWM inputs corresponding to Satellite 99°/101°.

**KEY**

- Coaxial Cable
- Power Cable  
(attached to power inserter)

\*Receivers in diagram can be non-DVR or DVR receivers.

**Non-DVR Receiver\***

**DVR Receiver\***

If connecting to a DVR receiver, do not connect a coaxial cable to the Satellite 2 input. With SWM, only connect to the Satellite 1 port (labeled FTM or SWM).

# Crank-ups, Dish & Tripod Kits with DIRECTV SWM8

The wiring diagram below applies to most portable dishes and tripod kits not already covered. The coaxial connection ports can be found at the base of the LNB for crank-up antennas, dish and tripod kits. For additional tips on connecting coaxial cables to a crank-up antenna, see the back page. Toggling to alternate satellites is not supported.

# DIRECTV Receiver Settings

Receiver settings are listed below for Winegard antennas using SWM technology. For more information on receiver setup and complete step-by-step instructions, refer to your satellite TV antenna manual, or go online to <http://www.winegard.com/receivers/setupguide.php>.

## SK-3005 TRAV'LER Antenna Settings

- Set the Dish Type for **04: Slimline-5**.  
Set the Switch Type for **01: SWM**.

- Note that B-Band Converters should not be used with SWM Technology.

## SK-3003 TRAV'LER Antenna Settings

- Set the Dish Type for **02: 3-LNB (18"x20")**.  
Set the Switch Type for **01: SWM**.

- Note that B-Band Converters should not be used with SWM Technology.

## Dome Antenna, Carryout Anser & MP1 Antenna, Crank-up Antenna, Dish & Tripod Kit Settings

- Set the Dish Type for **01: Round (18")**. If Round (18") is not available on the receiver, **Slimline-3** can be used.  
Set the Switch Type for **01: SWM**.

- Note that B-Band Converters should not be used with SWM Technology.
