THE BACTERIA FIGHTER • THE BACTERIA FIGHTER • THE BACTERIA FIGHTER

MODEL HL-180 IN-LINE WATER FILTER

NEW INSTALLATION:

1. Your Hydro Life filter is designed to be installed between two hoses.
2. Install incoming water line to female hose adapter on filter. Be sure arrow on filter, points in the direction the water will flow. Turn water on and briefly flush the system.
3. Turn off water. Connect hose from RV to male hose adapter on filter.
4. Turn water supply on.

IMPORTANT:

- Do not allow filter to freeze.
- Replace filter annually to maintain high quality water.
- When winterizing do not allow anti-freeze to flow through filter.
- Do not use where water is microbiologically unsafe or of unknown quality.
- If your RV or watercraft has not been used recently, turn water on and allow it to flow for several minutes to flush the system.
- During extended periods of non-use, store filter in a ziplock bag (provided) with water covering filter, in a cool location not colder than 35° F.

REPLACEMENT FILTER:

Replace if undesirable taste or odor appear, or if water flow decreases significantly. Please replace this filter with Hydro Life Filter #6, Model HL180.

If you should need assistance, please call your RV or marine parts dealer.
